DETAILED ACTION

Response to Amendment

1. The Amendment filed 10 November 2004 has been entered in full.
2. The amendment to the title has been entered in full and is persuasive.
3. The amendment to the claims has been entered in full and is persuasive. The objections on the objected claims have been withdrawn in view of the amendments to the respective claims.

Response to Arguments

4. Applicant's arguments, see pages 10-13 of the Amendment filed 10 November 2004, with respect to the claims, have been fully considered and are persuasive. Based on the applicant's arguments, 35 USC 103 rejection, on the respective claims has been withdrawn.

Allowable Subject Matter

Reasons for Allowance:

5. **Claims 1 - 15** are allowed.
6. The following is an examiner's statement of reasons for allowance:

The reasons for allowance should be evident from the applicant's arguments recited in pages 10-13 of the Amendment filed 10 November 2004. The instant invention relates to a method and an apparatus for generating three-dimensional data by detecting corresponding points of two two-dimensional images whose contents are similar to each other such as two

Art Unit: 2625

two-dimensional images captured stereographically with respect to an object using a gradient method or correlation method. As clearly admitted by the applicant in the applicant's admitted prior art (AAPA), both correlation method and gradient method are very well known in the art. The only specific part of invention that is different from the AAPA is that the system resides two detectors, which on selecting any one detector by the selector, can perform specifically any one of the gradient method or correlation method, to generate a three-dimensional image of the object. The AAPA along with the prior art of record does not teach the limitations:

(a) "a first detector for detecting corresponding points of the images by a gradient method; a second detector for detecting corresponding points of the images by a correlation method; a selector for selecting either one of the first detector or the second detector" as recited in claim 1 and similarly in claims 9 and 11.

Therefore, claims 1, 9, and 11 are allowed and all other claims depending on claims 1, 9 and 11 are allowable at least by dependency on claims 1, 9 and 11.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
